

5ineHTP in Breif

5ineHTP[®] is a high quality Griffonia Seed Extract , produced by Chemill inc., the only vertically integrated producer of Griffonia extracts and the single largest collector of Griffonia Seeds in the World.

Having our own facilities from seed collection to production to sales, helps us ensure full traceability of materials , highest quality and safety standards and assure consistent year round supply of the highest quality ingredient .

A percentage of sales proceeds of 5ineHTP[®] are directed to education of local farming communities in most sustainable harvesting techniques and education of their children.

Mission Statement

By adding value to every facet of our business, we ensure satisfaction of all sides while becoming invaluable to the product itself.

Making all related to 5ineHTP Feel 5ine, would ensure we continue to Be Happy !

Thus not only do we provide value to the marketplace by ensuring stable supply of a highest quality product with full traceability, backed with a vertically integrated supply chain with full control from seed harvest till final distribution but also to our suppliers by providing them the necessary education in sustainable harvesting techniques, micro-finance to aid their collection, fair price for their produce, full market information, employment for the women and also education for their children.

5ineHTP being a wonderful product does contribute to the positive well being of its consumers , while its Sales does also contribute to the well-being of lesser privileged children in W.Africa, the source county.

Its no surprise thus that we're the leading supplier of 5ineHTP to the marketplace and the single largest collector of Griffonia Seeds in the World.

Health Benefits

- Tension headaches Chronic daily headaches
- Premenstrual syndrome
- Fibromyalgia

Serotonin deficiency has also been implicated in uncontrollable appetite, obsessive-compulsive disorder(OCD), autism, social phobias, anxiety and panic, migraines, schizophrenia and extreme violence.

The 5ineHTP Story - Our World's a Happy Place

At Chemill we believe one thing "We can buy and sell Happiness" .This is best understood by observing what we fully do.

Our researchers travel throughout West African Forests braving severe weather and anti social elements in their Endeavour to identify sustainable growth areas of Griffonia Simplicifolia trees.

Once these areas have been identified we carry out an extensive campaign to educate the communities living there on sustainable collection techniques and safety procedures. The locals are then hired to harvest the crops. By providing a wealth of knowledge and buying their produce on a continuous basis we have made entire communities happy by providing sustainable Labor, businesses and Renewable knowledge. That's how we buy our Happiness.

The seeds once collected are transported to our cutting edge processing centre located in Tema, Ghana. The seeds are sun dried and checked for moisture at regular intervals, once dried we sort them in three categories. The biggest and fleshiest seeds are then exported to our State of the art plant located in the southern part of India for processing of 5ineHTP. The remaining seeds are then sold to other manufacturers who have the need for cheaper material. We have been awarded by the Government of Ghana twice for our efforts and milestone achievements. in harvesting and exports of the seeds. These encouragements give us more Happiness.

We use the highest quality Griffonia Simplicifolia seeds to process the finest premium quality pure L-5 Hydroxytryptopan branded 5ineHTP. We are the only brand available today who can ensure complete traceability of seeds and the only fully vertically integrated manufacturer of L-5 Hydroxytryptopan in the World. We are totally responsible for our 5ineHTP from collection of seeds to supplying our clients and consumers with in house quality checks at every stage. This also allows us to carry a stable stock inventory for supply to our end users round the year keeping them happy.

Serotonin is responsible for feelings of well being, satisfaction and for normal sleep patterns. Obesity, PMS, migraines, depression, anxiety, insomnia and addictive behavior has all been associated with low levels of serotonin.

5ineHTP or "Hydroxytryptopan" is the natural pre-cursor to serotonin in the body. And clinical studies have shown that supplementing with Hydroxytryptopan produced positive results in weight loss, anxiety and depression. It improved sleep patterns and reduced carbohydrate cravings in those on low carbohydrate diets. This overall wellbeing promotes happiness in Daily life. That's how we sell our happiness.

HIGHLIGHTS

- + Only manufacturer who is fully vertically integrated in the world.
- + The strongest performance record for collection and supply of seeds in the last five years.
- + Best quality of seeds used to make premium product
- + State of the art seed processing facility in Africa
- + World Class manufacturing facility in India.

- + Same day shipments

Feel 5ine! Be Happy! Initiative

We've launched our **Feel 5ine ! Be Happy !** initiative which presently supports primary education of over 500 underprivileged children in Ghana, West Africa.

Now we're joining together with Dosage producers in USA to jointly market our products

while contributing to our initiative, We believe that jointly contributing to the underprivileged in the source country is the most effective way to spread the happiness and also further add value to our supply chain.

The primary aim of this initiative is to undertake education and healthcare programs of children in Ghana, West Africa.

We now invite dosage producers in USA to join us in this initiative, to do our cause for the underprivileged in the source country, while stabilizing their own supply chain with our 5ineHTP.

For more details regarding this exciting initiative and how it can benefit your business, please contact Ray Tejsinghani , ray@chemill.com
